

Sergi Tubert Sabater - *Software Engineer* | *Node.js* • *React* • *Typescript* • *Azure*

stubertsabater@gmail.com | <https://www.linkedin.com/in/sergitubert/>

Profile

Full-Stack Software Engineer with 7+ years of experience designing and delivering scalable web applications using TypeScript, React, and Node.js. Experienced in building event-driven systems, REST APIs and cloud-native services on Azure, with strong ownership across the full development lifecycle, from architecture design to CI/CD automation and production monitoring.

Proven ability to improve system reliability and scalability through asynchronous architectures, message-driven systems. Comfortable working in cross-functional product teams and contributing to technical design decisions.

Professional Experience

- **Software Engineer**

Primer Impacto – Barcelona, Spain

July 2019 – December 2025

- Designed and delivered full-stack web applications using React, TypeScript, and NestJS, supporting multiple internal business workflows and integrations with third-party platforms.
- Introduced and led an event-driven architecture using Azure Service Bus, enabling asynchronous communication between systems, reducing latency and making the system more fault tolerant.
- Designed schemas for relational databases (MSSQL/MySQL), including query optimisation and indexing strategies for a fast data retrieval.
- Implemented CI/CD pipelines in Azure DevOps, automating build, testing, and deployment processes to deploy multiple times a day.
- Deployed applications on Azure App Services and Azure Functions, eliminating the need for infrastructure management and reducing operational overhead.
- Implemented logging and distributed tracing using Application Insights to improve system observability and request traceability in distributed systems.
- Collaborated closely with product owners and stakeholders to translate product requirements into scalable technical solutions.

- **Junior Software Engineer**

Winche Redes Comerciales – Barcelona, Spain

May 2016 – Jul 2018

- Developed and maintained features for a custom CMS platform using PHP, Symfony and Javascript/jQuery.
- Implemented CRUD systems for a backoffice platform, allowing the users to store and share data in a structured way.
- Participated in debugging and maintaining production systems in collaboration with other engineers.

Technical Skills

Languages & Frameworks: TypeScript, JavaScript, React, NestJS, Node.js

Databases: SQL (MSSQL, MySQL), MongoDB

Infrastructure, Cloud & DevOps: Azure ecosystem - Azure App Service, Azure Functions, Azure Service Bus, Azure Blob Storage, Azure Application Insights, Azure Pipelines (CI/CD)

Architecture: RESTful APIs, Event-driven architecture/Message-queue systems, Microservices, Hexagonal Architecture

Development tools: Testing, Git, Docker

Currently working on:

- Domain Driven Design

Education

Bachelor's Degree in Computer Science

Universitat Politècnica de Mataró – Spain

Graduated: 2019

Java Backend Bootcamp - Spring and microservices

Ironhack - Barcelona

June 2022 - October 2022

Certifications

Azure AZ-900 - Issued March 2023

Additional Information

Languages:

- Native Spanish
- Fluent English - UKVI SELT certified November 2025
